

Otherdays

Max Jury

I wanna tell you a secret I've gotta let you know
When I'm around you you make me feel like an animal
No second guessing the future it's something chemical
I've never felt so alive and not alone

I need you
It's simple to see now
Yes, I need you
To make it through

I wanna tell you a secret it's all I've ever known
Before I met you I felt like I was invisible
No looking back at the past we're on a different road
I've never felt so alive for so long

I need you
Simple as love is
I need you
To make it through

Outside the morning sun is hanging off the vine
We make love when the time is right
Someday's win or lose waiting for a sign
We make the darkness come alive
Come alive
