

# Marley

Max McNown

Well my car and I broke down on a road outside La Pine  
And on that same day she told me she loved me she changed her mind  
My application got turned down cause my credit's 504  
I'll take my boots and these problems and leave them both by the door

Put the needle on Marley  
Throw your worries in the fire  
Cause we've been rolling down a long hard road bad times ain't hard to find  
And this world is headed nowhere fast got nowhere else to go  
Put the needle on Marley and let the good times roll

Looks like I lost another day lost in my phone  
It's like we're burning out together together alone  
We're not meant to carry all of this  
We don't got the bandwidth  
I'm tired of playing along

Put the needle on Marley  
Throw your worries in the fire  
Cause we've been rolling down a long hard road bad times ain't hard to find  
And this world is headed nowhere fast got nowhere else to go  
Put the needle on Marley and let the good times roll

Well if every little thing's gonna be alright  
Then all the dark days have a brighter side  
Turn the lights down low  
Stir it up let's go

And put the needle on Marley  
Throw your worries in the fire  
Cause we've been rolling down a long hard road bad times ain't hard to find  
And this world is headed nowhere fast  
Got nowhere else to go  
So put the needle on Marley  
And let the good times roll  
Put the needle on Marley  
And let the good times roll
