

1998 Interlude

Maxo Kream

Just catching up to the crossover
So how do you do this new move?

I do a slow spin, then let the defender see which direction I'm
going in
And once he tries to beat me to the spot, I put the ball behind
my back and go in another direction

And then active cushions that stabilizes every step
With avid moves you're never where they expect you to be!

Yeah I wonder what they'll say about this one
