

Even when the world's gone crazy
And the suns fallen down
A little bit of light though it's shady
I've found
Stuck in my room it ain't easy
Counting my time out loud
But I don't mind if it goes any longer
Cause it you that I found

Let's get away
Head into the blue
Any road block in our way
We'll drive on through

Cause you make me feel safe
You make me feel safe
You make me feel safe
From it all
You make me feel safe
You make me feel safe
Like I'm in the right place
Even when they all say there is no safe at all

Well even when the worlds gone a little mad
Like a kite in a storm
No peace of mind to be had
Well at least you keep me warm
This game of life it ain't easy
When it seems no one can win
But I keep thinkin maybe
It will be all good when

When we get away
Into the blue
Any road block in our way
We'll drive on through

Cause you make me feel safe
You make me feel safe
You make me feel safe
From it all
You make me feel safe
You make me feel safe
Like I'm in the right place
Even when they all say there is no safe at all
No safe at all
No safe at all
Even when they say all say there is no
Safe at all
