

All In

!Mayday!

From the night to the early morning
I'll be on call if you really want it
I'll be outside when you really on it
I couldn't stay away even if I wanted

You know I'm all in
So whatever it is, I'm all in
I got nothing to lose, I'm all in
Pick a time or place, or any situation
Make no mistake, I'm all in

Falling out of bed, I wake up with a grind, try'na get the paystub
I don't need to open up a K-Cup, take it straight up to the bass bump
See the state of every case of losers crying in debate club
Got some stray stub to the pay mud
I don't really feel the need to say much
I'm all in like 31 Black when it spins on the roule'
I'm 30 something, Son it's quite tricky tryin' to fool me
See I don't think about the medals I won or the rubies
I only think about what else I could fit in the routine
Workaholic, obsessive essence, my flow is mileage
That takes you places, I'm up to give bass like I'm your pilot
Any time, any place, I face it like it's "Your Highness"
Never been one to do less, oh yes, that's just my appliance
So hit me if you been thinkin' inklings of getting busy
I'm down for It like kids in Derry, these clowns are shifty
I'm ride or die and I prefer to ride until it's iffy
So count me in 'cause I never needed you to convince me

From the night to the early morning
I'll be on call if you really want it
I'll be outside when you really on it
I couldn't stay away even if I wanted

You know I'm all in
So whatever it is, I'm all in
I got nothing to lose, I'm all in
Pick a time or place, or any situation
Make no mistake, I'm all in

I'm all in pushing big stacks fully committed, that's big facts
When my verse lay got a curse laced in my syntax, that's witchcraft
Which cap plotting sneak attack? On dry leaves when that twig snap
Don't be surprised when that death triggers your neck snap, I rig traps
Predatory, I'm never boring, no goal directions
When I bless a track, just another prize for my skull collection
Plenty of room if you'd like to join in my soul collective
Choose your own adventure and take a risk at your own discretion
Don't ever question resolve or impugn integrity
Just know that I am in, that is all, now queue the melody
I never need a pill to improve my mood or my chemistry
Lay fire in the booth without the use of amphetamine
This is fraternity, a brotherhood that's understood
No need for please and thanks we like to keep it Frank, Underwood
My team's living the dream, if you feel the need to slumber good
You'll leave with lots of lumps, we pop the trunk, I wish y'all fuckin would
, punk

From the night to the early morning
I'll be on call if you really want it
I'll be outside when you really on it
I couldn't stay away even if I wanted

You know I'm all in
So whatever it is, I'm all in
I got nothing to lose, I'm all in
Pick a time or place, or any situation
Make no mistake, I'm all in

I'm the type to start a fight that I ain't supposed to win
Up all night in the title 'bout to cook the morning eggs
I be like "yo, let's travel light and come back broke as shit"
Living like it's the only life I really gots to live
Papa told me "Save your money and mind your business"
Mama said she loved me despite my bad decisions
Never wishy-washy, just watch me on the ticket
Safe to say I ain't been playing it safe
Ain't no such thing as half-way crooks in this place
Up my sleeve keep an ace
Some go to sleep then never wake so I'ma keep at my pace
Keep my bucket list down the street and pray for more Sundays
You know I be playing for keeps and never more "some days"
They can ask and can inquire why we keep making fire
While they standing out in the booth, trying to just feel inspired
I've been writing my life in bold since I started this ride
Ain't letting up until I'm losing my mind, and that could be anytime

From the night to the early morning
I'll be on call if you really want it
I'll be outside when you really on it
I couldn't stay away even if I wanted

You know I'm all in
So whatever it is, I'm all in
I got nothing to lose, I'm all in
Pick a time or place, or any situation
Make no mistake, I'm all in
