

# Last One Standing

iMayday!

Who'll be the last one standing? When it all goes up in flames  
Who'll be the last one standing? When the cold ice melts away  
Who'll be the last one standing? When the smoke drowns out the day  
Who'll be the last one standing? When it all goes up in flames  
I'll be the last one standing!

Coming out from the middle of the map with a limited attack  
And I fight it till the end before we get it to the idiots, illiterate attack  
Diss that, belligerent we're never that!  
Fuck peace, gimme a gun and get it back  
When the television crack I'm developing a pack with this medicine for many  
not a penny will be levied  
I'll be ready for the evil clan, nah, fuck that!  
Stand up and get yourself a better back  
Spinal chords struck with a bat  
Ever seen a grown man fast to react?  
Well I do when I'm feelin up and runnin' up their stats  
Take a weight of every life we live  
And get snubbed by the ones who want to fight for this  
I'm decisive hits without a license, bitch  
And move now if you know you need to vibe with this

Soldier till the death of me, till my last breath come from my lifeless lungs  
Some kill for the recipe  
If it all burned down which one of us gon' run?  
Which one from the place of glory? Short ending with a long story  
Maybe we want too much and program but the city do not give a fuck, a blood  
oath!  
One for the saints, one for my bros, two for my brains  
One for the ghost that are haunting my friend while I been out here workin'  
to get us some chains  
Now I realize that we're slow and I wait  
But I be dead cause it's probably too late  
Was betrayed by my friend and I feel like I'm play mercenary, too scary to  
come to love with the fame  
Now we coast

Where my crew, where my kin, where are all my believers at? Where are all of  
my samurai, mastering their craft? I don't know, man I don't know where all  
them go. I don't know, I don't know...

Who'll be the last one standing? When it all goes up in flames  
Who'll be the last one standing? When the cold ice melts away  
Who'll be the last one standing? When the smoke drowns out the day  
Who'll be the last one standing? When it all goes up in flames  
I'll be the last one standing!

Kick it up into the center of the madness, they say it to me that it's kill  
or be killed  
Never diss up in the penny of a savage, it's like I want to come a shoot em  
at the wheel  
Kill to still feel the chill  
The cold days let me know that I am definitely alive  
And I walked in the valley with the vibe but by carrying the time  
But they hassle me to drive

Can I dive, high, glide, by, try, get up!  
See the enemies are eyes, wide, tried, high, jealous fucks!  
This forever been the state of war  
Morse code, all alone in the safer door  
Take the tour, be late for the ancient whore  
I'm a fighter till the end, that's what the bass is for!

Maaan, I swear I saw it coming, no crystal ball was needed  
Too much, too soon and now my trench is missing, soldiers bleeding  
Missin' some other hethens, but I ain't got no grievance  
Everybody's fightin wars against they own personal demons  
Hurricane's got a little bit of aim, pop pop at the window pane  
Doc Brown of Delorian fame, couldn't do shit when he cropped that fame  
And I smile like it's okay, but fuck the world is what I say  
Under my breath when they turn away cause this game is rigged to keep us enslaved!

Who'll be the last one standing? When it all goes up in flames  
Who'll be the last one standing? When the cold ice melts away  
Who'll be the last one standing? When the smoke drowns out the day  
Who'll be the last one standing? When it all goes up in flames  
I'll be the last one standing!

In the middle of a crisis  
N9ne has got a knife and I get really hype and fight the type to spite the  
Light then ignite the righteous  
Let's get the bright devices, and wipe the likeness!  
Kill em and will em I get the pilly and then the devil  
I was a happy go-lucky then I'm at another level  
Cause everybody wanna be evil people  
We believe a demon gotta bleed from eagles!  
And that's 'kays, Tech sprays on a vet's day, you gotta death weigh  
I got an angel up in my x-  
ray, but when the debts laid, that is your Net Pay!  
You don't wanna be caught and stuck in a rut  
Angels aimin' ammo up in your butt  
Last one's standing tough and abrupt  
Tecca N9ne and ;Mayday! fucking you up!

Motherfucker  
Shit got me ready to fight, my nigga! Hahaha
