Need To Be

¡Mayday!

Where you need to be
Right where you need to be (yeah)
Where you need to be (uh huh)
You're right where you need to be (woop)
Yeah
You're right where you need to be

I was somewhere that you wouldn't even understand
Been to places where the pilot couldn't even land (that's right)
Seen faces in locations where you'd never hang
Outta patience trying to make it to another bag (let's go)
They been asking where I'm at cuz I ain't where they chill
I'm on a mission for the answers that they ain't reveal (they don't know)
And every time I get lost and can't breathe
I call my mama and she always say to me you're right

Where you need to be
Right where you need to be
Where you need to be
You're right where you need to be (woop)
Yeah
You're right where you need to be

See it so be it me I been swimming through lo-cals
My bus us on the corner of Arizona and So cal
I'm walking the tightrope right over the low down
And trying to not to fall into the venomous tropes now
The Mystic Journeymen who travel round the planet (woop)
Peddling this language out to those who understand it
I can still hear them teachers telling me I need to can it
Man were they ever wrong I knew the plan damn it

Where you need to be
Right where you need to be
Where you need to be
You're right where you need to be (woop)
Yeah
You're right where you need to be

Even when it seems as if it's not the place you spose to be
The moments at the bottom as important as the victories
It's all a part of growin'
Never knowin' what it's all about
Sometimes I learned the easy way
Sometimes I took the harder route
It all lead up to now and looking back
I can see the blood sweat and tears in the footsteps on my path
And these tracks that I lay as I move on
Will be the only part of me remaining when I'm gone

Where you need to be
Right where you need to be
Where you need to be
You're right where you need to be
Yeah
You're right where you need to be

```
Where you need to be
Right where you need to be
Where you need to be
You're right where you need to be
Yeah
You're right where you need to be

Right where you need to be
Yeah
You're right where you need to be
```
