Occoh

Girl don't lie

I know that Corsican rosé stays on your mind

Ohhh

What went wrong

We used to turn up Serge Gainsbourg and sing along

I had a nice vacation
On to the next location
Any port in a storm to keep me warm

I shoulda told you you're the only one for me How could I ever be so blind
I should have never let you find another guy
There'll never be another time for you and me
I should've held on to you tight
Now we'll forever be ships passing in the night

In the night
In the night
We'll forever be ships passing

Oooh

Mon amour

I stood and stared back at you as I closed the door Oohhh it broke my heart
To see that photo of you in each others arms

I had a nice vacation
On to the next location
Any port in a storm to keep me warm

I should told you you're the only one for me How could I ever be so blind
I should have never let you find another guy There'll never be another time for you and me I should've held on to you tight
Now we'll forever be ships passing in the night

In the night
In the night
We'll forever be ships passing

If I could turn back the hands of time I'd never leave your love behind Maybe I'll meet you in the next life And you'll be mine

I should told you you're the only one for me How could I ever be so blind
I should have never let you find another guy
There'll never be another time for you and me
I should've held on to you tight
Now we'll forever be ships passing in the night

In the night

In the night
We'll forever be ships passing
