

If You Need A Friend

Maywood

Whatever it takes, I'm gonna be right beside you
I know you'll understand one day, baby
You can make it alone, I wanna be there to guide you
So please don't send me away
I see that sad look in your eyes
But maybe we can find our paradise

If you need a friend
You can always count on my love
If you're down and out
Just cry out loud for my love
I will help you on your feet
So if I'm the one you need
Here's my, here's my love

Turn on the light, let's get the party started
For old time's sake, yeah
Many a nights, you left someone broken-hearted
There'll be no more hearts to break, no
We have been waiting for too long
Now there's a dream to build our world upon

If you need a friend
You can always count on my love
If you're down and out
Just cry out loud for my love
I will help you on your feet
So if I'm the one you need
Here's my, here's my love

If you need a friend
You can always count on my love
If you're down and out
Just cry out loud for my love
'Cause I will help you on your feet
So if I'm the one you need
Here's my, here's my love
