Whatever it takes, I'm gonna be right beside you I know you'll understand one day, baby You can make it alone, I wanna be there to guide you So please don't send me away I see that sad look in your eyes But maybe we can find our paradise

If you need a friend
You can always count on my love
If you're down and out
Just cry out loud for my love
I will help you on your feet
So if I'm the one you need
Here's my, here's my love

Turn on the light, let's get the party started For old time's sake, yeah
Many a nights, you left someone broken-hearted There'll be no more hearts to break, no
We have been waiting for too long
Now there's a dream to build our world upon

If you need a friend
You can always count on my love
If you're down and out
Just cry out loud for my love
I will help you on your feet
So if I'm the one you need
Here's my, here's my love

If you need a friend
You can always count on my love
If you're down and out
Just cry out loud for my love
'Cause I will help you on your feet
So if I'm the one you need
Here's my, here's my love
