

Whu where am I? It's so hot in here it's boiling up!

Welcome to hell

Hi! Than- oh wow, to hell! That's where I am? It's hot!

It's hot by definition

This is hell? It's a strong temperature shift. You really gotta warn somebody before they pop you into that void

Wha-what are you talking about? That's all we ever do is warn people. You ever hear "it's hot as hell"? It's kinda an old phrase?

Right.

That's what that means.
