

# Red Moon

MC Chris

As if no one ever told ya Magic City North Dakota  
Was a town that met its quota, really quick  
A railroad track hacked through a prairie  
Packed with goods it liked to carry, a smoking stack so very scary black and  
thick  
Train was grounded can't reroute it, so, a simple town was founded  
Bedouins were all about it, this would stick  
A tent went up and in five months, the place went nuts with cowboys stuff  
This city is fitting for I, treasure tricks

Why not Minot let us pray we will somehow find a way?  
The waters might come rising but up high they'll never stay  
We'll make our rivals 'cause our prides a tidal wave  
There's not a lot to save but we've got dignity for days  
We won't accept to defeat though tragedy repeats  
The tempest just a test that won't get the best of me  
I hear why you don't leave how could I leave the air I breathe  
Minot is a lighthouse in a sea of golden wheat

Minot North Dakota is like Dagoba to Yoda  
Heaven to Jehovah, no offense  
The town went down the crapper, filled with gangsters and their flappers  
Everybody's lookin' dapper in their threads  
Tunnels underground, never meant to be found  
Delivered booze barrel bound for the head  
Capone was a gnome, flooded folks with the foam  
Hard liquor in your dome will leave you dead

Why not Minot let us pray we will somehow find a way?  
The waters might come rising but up high they'll never stay  
We'll make our rivals 'cause our prides a tidal wave  
There's not a lot to save but we've got dignity for days  
We won't accept to defeat though tragedy repeats  
The tempest just a test that won't get the best of me  
I hear why you don't leave how could I leave the air I breathe  
Minot is a lighthouse in a sea of golden wheat

1969, it was such a crazy time  
There wasn't any crime and there was peace  
The clouds gathered once again, black and thick is this the end  
A flood is not my friend, it is a beast  
To its cave it did retreat and the city found its feet  
But this catastrophic fleet would never cease  
And that railroad of hill would bring a chemical spill  
It made every body ill, we need relief

Why not Minot let us pray we will somehow find a way?  
The waters might come rising but up high they'll never stay  
We'll make our rivals 'cause our prides a tidal wave  
There's not a lot to save but we've got dignity for days  
We won't accept to defeat though tragedy repeats  
The tempest just a test that won't get the best of me  
I hear why you don't leave how could I leave the air I breathe  
Minot is a lighthouse in a sea of golden wheat

The story doesn't get better, the city just gets wetter  
Somebody send a letter to Mother Nature

Another flood in elven had us praying up to Heaven  
When will you be sending us another savior  
Four thousand homes are in the zone, now, I'm living all alone  
Everything that I did own, well, it's just vapor  
I got a trailer from Fema 'cause Minot's a marina  
It's my little Iwo Jima, sign the papers

Why not Minot let us pray we will somehow find a way?  
The waters might come rising but up high they'll never stay  
We'll make our rivals 'cause our prides a tidal wave  
There's not a lot to save but we've got dignity for days  
We won't accept to defeat though tragedy repeats  
The tempest just a test that won't get the best of me  
I hear why you don't leave how could I leave the air I breathe  
Minot is a lighthouse in a sea of golden wheat
