

I was out shopping, the other day  
Till my man went live with an AMA  
When the alert hit me via (what) 5G  
I was like Proof of stake or proof of ground beef?  
Coming Live from Boulder where it's always sunny  
And sometimes Colorado, Chuck's talking money  
But not Fiat though he can't pretend  
That we can ignore a recent market down trend  
Though fluctuations might astonish us  
He celebrates the downfall of bitcoin dominance  
I forgot to do the dishes his talks are that amazing  
Cardano project got us all star gazing  
When I feel the world is ending, I thinking I might just  
Check his thoughts on programmable finance  
Fighting double speak, we've got Charles on the mic  
Opting out the legacy financial system tonight

Charles Hoskinson has got a lot to say  
(ADA AMA)  
Looks like our afternoon's spoken for today  
(ADA AMA)  
Stop everything, put that book away  
(ADA AMA)  
I heard that he's been fasting, the dude looks great  
(ADA AMA)

My phone battery died the other day at Traget  
Because he was on YouTube talking arbitrary markets  
I couldn't text my wife that I was running late  
As he explained ways to stabilize nation states  
I tried to tell my family but none of them were hearing me  
Siloed in my office, it's top down tyranny  
Getting negative interest from my closest friends  
Hyper deflated engagement once again  
Stealing WiFi from my neighbors (redistribution)  
He's talking antiquated systems and broken institutions  
And if he were my brother I hope I'd be forgiven  
If I gave him a job, though he hates nepotism  
The father of Cardano, the crypto king Hyperion  
Who hates to be called the co-founder of Ethereum  
Answer questions open source, clearly committed  
Blockchain planet he predicted, to his channel I'm addicted

I won't be home for Christmas, but let me explain  
(ADA AMA)  
Will we still survive if they don't regulate the banks?  
(ADA AMA)  
On multi-party computations, what progress as he made?  
(ADA AMA)  
I think the market ecosystem is going to be okay  
(ADA AMA)

Wait, Roger Rabbit 2 is premiering tonight, and ICP did the soundtrack? And  
KRS-One and Bill Watterson are giving you a ride over there? That sounds fun  
and all, but I can't go, Charles Hoskinson's doing another AMA. Apparently h  
e doesn't trust the central banking system.
