

# Fear of a Blockchain Planet

MC Lars

Pizzagate, deep state, y'all really believe this?  
And on January 6th we were ambushed by extremists  
While the bots fanned the flames from the shores of Coeur d'Alene  
To the hills of West Virginia, algorithmically enraged  
As they trended, divided, regrouped, and rebranded  
Transplanted, implanted, expanded, demanded  
Palo Alto über alles, Huxley warned us this would happen  
Mainline the oxytocin and they'd monetize distraction  
"This laptop kills fascists", I once shouted proudly  
Now our phones make us tired, anxious, and grouchy  
Looks like Hagel was right, divided so polemical  
And then they pull to narratives that won't seem so untenable

They buried Steve Jobs while Alexander wept  
They NFT'd the planet in secret while we slept  
Upvoted it on Reddit as they menaced the Hellenics  
I think there just might be a dark side to this global pandemic

Blockchain planet is the fear of the blockchain  
Blockchain planet is the fear of the blockchain  
Blockchain planet is the fear of the blockchain  
Decentralized Web 3.0, here we go on the  
Blockchain planet is the fear of the blockchain  
Blockchain planet is the fear of the blockchain  
Blockchain planet is the fear of the blockchain  
Decentralized Web 3.0, here we go

And everyone raps now, what am I even doing?  
Playing chicken with my dreams for twenty years and still pursuing?  
This quick sided quest, chasing windmills with my friends  
While Cervantes writes the sequel and I'm not sure how it ends  
And I don't want you at my concerts anti-vaxxers, please stay home  
Yeah, I said it, play it back, y'all ain't welcome at my shows  
And if you didn't hear me, here's the point I'm trying to tell you  
That unsafe, reckless people are not welcome in the venue  
Flat-earthers round the world, stop, please don't make me laugh  
Because I believe in science and facts are still facts  
They're screaming "white genocide", it's a lie, as they try  
To terrify the masses and get them on their side

They buried Steve Jobs while Alexander wept  
They NFT'd the planet in secret while we slept  
[?] the aesthetic was authentic  
But what if there's a bright side to this global pandemic?

Blockchain planet is the fear of the blockchain  
Blockchain planet is the fear of the blockchain  
Blockchain planet is the fear of the blockchain  
Decentralized Web 3.0, here we go on the  
Blockchain planet is the fear of the blockchain  
Blockchain planet is the fear of the blockchain  
Blockchain planet is the fear of the blockchain  
Decentralized Web 3.0, here we go

And Alexander wept  
And Alexander wept  
And Alexander wept

And Alexander wept

So now you're getting the vibe of this record  
It's a little angrier, a little more real  
I have no patience for white supremacists  
Anti-vaxxers, flat-earthers  
Don't come at me with that insane garbage  
This isn't 1244, it's not the Middle Ages  
Anyway, welcome to blockchain planet
