

# Kidney Stones For Easter

MC Lars

I woke up Easter morning in excruciating pain  
I guess kidney stones they were coming through again  
a mom in a hospital giving child birth  
it's the guy version, listen, nothing feels worse  
It's true the Easter Bunny had a new gift  
It's ironic, chocolate eggs weren't on my list  
Laid up in Olympia wish I could forget  
How oxycodon tripped me out high on endocet  
But Bryce is fine Bryce is chill  
He can write rhymes taking little white pills  
I'm hopped up on Red Bull let's cut to the chase  
that's how I got kidney stones in the first place!

i do oxycodone for recreation  
i don't need kidney stones to party for days and  
i like my drugs made by smarter doctors  
'Cause i don't want to gamble my life like proctor  
pill popper even lil wayne thinks im crazy  
cuz i'll pop an oc and drive i'm swayze  
it's a doc holiday and i'm a daisy  
lars pass them pills you know they don't faze me  
poppin' anticholergenic action  
benadryl or tagemet making me spin  
dissolve the pill in a glass of cold water  
extract the opiates and nod off harder  
sitting back in my chair  
the world looks so great from way up here  
surfing up the internet on percocet  
it don't get much better than this  
best believe cobain and bradley knowles  
hendrix, joplin, belushi showed  
me how to do things right gotta stay vital  
no need to fall in a downward spiral  
there's a reason opiates through history  
were used by our predecessors oh so swiftly  
wrote these rhymes spun off watson  
and i don't know if i'm ever ever gonna stop son
