

## Paul Is Dead

MC Lars

The government is lying!  
Don't believe everything you hear!  
In fact, there's a logical explanation for everything  
Let's trace it back to the genesis  
Conspiracy theories (conspiracy theories)  
It's MC Lars and the Rondo Brothers tearing it up!!

I'm dropping knowledge on conspiracy theories  
Do you hear me?  
It's evident the government is lying monthly, yearly  
Because JFK's death was the direct result  
Of the Chupacabra submerging a ginormous boat  
The Titanic, don't panic, it was sunk by this beast  
Then the Loch Ness Monster had a yummy icy feast  
OJ Simpson? Innocent, it was Big Foot on crack  
Who had a jealous rage and snapped Ron Goldman's back  
In fact the facts explain everything you might deny  
Big Foot crashed in Roswell, let me tell you why  
He was chilling with some aliens who couldn't really fly  
So they landed in New Mexico that's why reports imply  
The Manson Family and Timothy McVey  
Were evil demon robots built by the CIA  
That the mafia enlisted for an insidious plot  
I read it on the Internet, the facts say a lot!

aliens and magic bullets masonic rites are the coolest  
illuminati got me abducted my body john gotti  
doesnt even know if jimmy hoffa died clearly  
just another mystical conspiracy theory

"Paul is dead," that's what the record said  
So I played it backwards every time I went to bed  
When I woke up Judas Priest were dancing naked on my dresser  
More annoying than an hour of Fran Drescher  
The Jersey Devil and the Jackalope  
The Yeti and the Unicorn couldn't really cope  
So they froze Walt Disney with the Free Masons' Union  
While Anton La Vey had a Satanic communion  
With Pope John Paul and Pee Wee Herman  
While General Sherman helped the Germans  
Invade Poland with Dividians enlisted  
I determined these facts though they were once restricted  
I guess you're wondering how I figured out  
What all these conspiracies are really all about?  
On TV Ice T once denigrated cops  
Now he plays a cop on TV, when will it stop??
