

Snow falls from your windowsill
I know you've got me figured out
I'll stay but only till it hurts
I know our hearts are running around

We walk that hidden path for love
We walk carefully again
I'll stay but only till it hurts
I know our hearts are running around

New cars driving along again
Slipped up, barely slipped my mind
We stay but only till it hurts
I know you feel like you're left behind

I know
Finally figured it out
I know
Finally figured it out
I know
Finally figured it out
I know
Finally figured it out

Tommy's gonna be late again
Leather jackets and drinking with his friends
He stays but only till it hurts
We know the way this story ends

I know
Finally figured it out
I know
Exactly where we go
I know
Finally figured it out
I know
Finally figured it out

Finally figured it out
Finally figured it out
Finally figured it out
Finally figured it out
Finally figured it out
Finally figured it out
Finally figured it out
Finally figured it out
