Graveyard

McCafferty

Prom Queen's pulling up like she never fucking saw it
Gun up to her head, come on, baby, make a promise
Loser's pulling up with a gun inside his pocket
Assholes gonna act like they never fucking caused it
Parents pulling up to the crime scene now
And I'm screaming mommy, please don't let him take me down
But loser's pulling up with a gun inside his pocket
Assholes gonna act like they never fucking caused it

The last thing she said was I am so sorry
But come on, sweetheart, don't give me apologies
Where is my mom? Just get me my mom
Where is my dad? Just get me my dad

It's dark around here, real dark around here
I've heard that song here like ten times before
I realize it now I was the darkness
Realize it now you were the light
It's dark around here, real dark around here
I've heard that song here like ten times before
I realize it now I was the darkness
Realize it now you were the light

I hang out where I belong
In the graveyard
I hang out where I belong
In the darkness
I hang out where I belong
In the graveyard
I hang out where I belong
In the darkness

I hang out where I belong
In the graveyard
I hang out where I belong
In the darkness
I hang out where I belong
In the graveyard
I hang out where
I hang out where

The last thing she said was I am so sorry
But come on, sweetheart, don't give me apologies
Where is my mom? Just get me my mom
Where is my dad? Just get me my dad

It's dark around here, real dark around here
I've heard that song here like ten times before
I realize it now I was the darkness
Realize it now you were the light
It's dark around here, real dark around here
I've heard that song here like ten times before
I realize it now I was the darkness
Realize it now you were the light

I hang out where I belong
In the graveyard

```
I hang out where I belong
In the darkness
I hang out where I belong
In the graveyard
I hang out where
I hang out where

I hang out where I belong
In the graveyard
I hang out where I belong
In the darkness
I hang out where I belong
In the graveyard
I hang out where
I hang out where
```
