

# Something Eyes

McCafferty

One, two, six, five

The movie goes like this  
Her arm, my leg, inside my head it plays again  
My self esteem is broken bad  
The confidence I never had  
The girls I love, the guys they date  
The cars they drive and license plates  
I memorize to know your name  
You'll know my name, I'm sure of that  
You'll know my name, I'm sure of that

I didn't sleep in my bed last night  
The marks on her neck, the ones from the bites  
She says that she's scared, he said that she should be  
She's scared of herself and all that she could be

Noah said I'm better off inside a grave  
The way I act and misbehave  
My parents' house, the attic scene  
The kids who said they needed me  
The friends who said they needed me  
The girls who said they hated me  
The kids who all made fun of me, oh

It's black and blue inside my head  
The way she laid on top the bed  
With long brown hair and something eyes  
I could not keep her face from mine  
It's black and blue inside my head  
The way she laid on top the bed  
With long brown hair and something eyes  
I could not keep her face from mine  
I could not keep her face from mine

I did it, guys!  
Yay
