

# Throat

McCafferty

Waterfall your drink into my mouth  
So I can get so fuckin drunk  
You can shove it down my throat  
You can shove it down our throats  
You can make me feel ashamed  
For every shitty thing I've done  
But then I'll finally kill myself  
And you'll never have your fun

You know that I will be the mouse  
And you will be that cat  
And I will slit your throat  
And that is fuckin that  
It's on and off again good god  
I am so alone it's odd  
Heart is fuckin full so what  
Gracious for the gifts of the earth

Liquid lips like gold  
I know that you were told  
On how to live your life  
You stay awake at night  
With drugs in both your hands  
You'll never understand  
The way I fucking feel  
I guess that I don't care

It's liquid lips like gold  
I know that you were told  
On how to live your life  
You stay awake at night  
The keyboard in your hands  
You'll never understand  
The way I fucking feel  
I guess that you don't care

We're in your car  
And it is bad  
Cause you are happy  
And I am sad  
You say it's complicated  
Your love faded

We're in your car  
And it is bad  
Cause you are happy  
While I am sad  
You say it's complicated  
Your love faded out

Up away like a ghost  
Can I ever come where I feel like I belong?
