

Loner

Mcfly

It's quiet in the universe
No chorus, middle-eight, or verse
And things are only getting worse
I'm alone, I'm alone, so alone

It's silent in the Milky Way
ET isn't on his way
And no one's coming out to play
I'm alone, so alone
I'm the loner of the universe!

Turn the radio up in this rocket
No one else around can stop it
Not a soul is passing me by
I'm a shooting star in the sky
A million miles away from home
Half way across the universe
And I'm alone

I traveled into outer space
I haven't seen a friendly face
I guess I'm an acquired taste
I'm alone, so alone
I'm the loner of the universe!

Turn the radio up in this rocket
No one else around can stop it
Not a soul is passing me by
I'm a shooting star in the sky
A million miles away from home
Half way across the universe
And I'm alone

On my own, I'm on my own
I'm alone - yeah, I'm alone!
On my own, I'm on my own
I'm alone - yeah, I'm alone!
On my own, I'm on my own
I'm alone - yeah, I'm alone!

It's quiet in the universe
One small step and I'm the first
To sing a chorus, middle-eight and verse
Still I'm alone, so alone, I'm alone

Turn the radio up in this rocket
No one else around can stop it
Not a soul is passing me by
I'm a shooting star in the sky
A million miles away from home
Half way across the universe
And I'm alone
