

# The Greatest Band In The Universe

**Mcfly**

A long, long, very long time ago  
Or so the legend is told  
There was an awesome band who loved to rock  
And they were only ten years old

They played real loud, they played real fast  
The best, no ifs or buts  
"Who was this band?"  
I hear you cry  
The answer, my friend, is us

We're the greatest band in the universe  
The best in the galaxy (the best in the galaxy)  
We're rock stars who rock the stars  
Nothing stands in our Milky Way

We're the greatest band in the universe  
And all our lyrics rhyme (all our lyrics rhyme)  
Even gravity can't pull us down  
We're light years ahead of our time  
Light years ahead of our time  
Light years ahead of our time
