

Future Worlds

Meat Beat Manifesto

With the use of electronic filters and other methods, we will simulate the sound of speech

We can design future worlds
We can design future worlds

By this time you should have adjusted the volume of your phonograph or record player to a comfortable listening level

For those with normal hearing
And set the tone controls as instructed on the jacket
As far as practical, all of the people listening should be seated approximately six to eight feet from the speaker
Remember, once the volume control is set, do not readjust
Do not readjust
