

# The Synesthesia Signal

Mechina

Hear the leaves with the breeze  
Clouds form from a distant sea  
With rain comes light  
Upon incandescent Flora

Captivating our eyes  
This Horizon only breeds humility  
Oh, how fragile is the signal

I never could believe  
The era of machines  
Would deliver us from afar  
We have been reborn  
I never could believe  
The era of machines  
Would deliver us from afar  
Reborn to conquer the stars

Fragments of old earth  
Air, rain and soil  
Feel the storm evolving  
Guiding us into the shadows

Captivating our eyes  
This Horizon only breeds humility  
Oh, how fragile is the signal

I never could believe  
The era of machines  
Would deliver us from afar  
We have been reborn  
I never could believe  
The era of machines  
Would deliver us from afar  
Reborn to conquer the stars

Captivating our eyes  
This Horizon only breeds humility  
Oh, how fragile is the signal

I never could believe  
The era of machines  
Would deliver us from afar  
We have been reborn  
I never could believe  
The era of machines  
Would deliver us from afar  
Reborn to conquer the stars

Fragments of old earth  
Air, rain and soil  
Feel the storm evolving  
Guiding us into the shadows
