

# Another World

Meduza

I'll find you, oh  
In another world, in another world

We're drifting in silence, destined to collide  
Does love last forever or just get lost in time?  
High in skies of diamonds, I know your light is always shining  
Blinded by the shadow of the moon

I'll find you, oh  
In another world, in another world  
I'll find you, oh  
In another world, in another world  
In another world

I'll find you, oh  
In another world, in another world  
I'll find you, oh  
In another world, in another world

Another world  
Another world
