

Fireproof

Meg & Dia

Wish I could say the good was worth the bad
Or at least the sex was the best I ever had
Or say that you're the one that got away
But you're not, you were my mistake
You told me I was too much in my head
Spill my heart and you would answer with a text
There's a body count of people that you used
We got burned, and you were fireproof
We got burned, but you were fireproof

My friends said better watch out for that one
You'll be bitter, you'll be broken when he's done
You weren't kind enough to cut me loose
I got burned and you were fireproof
I got burned and you were fireproof

If I could do it all again
I would have driven myself home from that party
Would have said no thank you, darling I'm sorry
If I could do it all again
I would have called it a night
But I was so naive, it's kind of funny
The way I lost my good sense for somebody
Yeah, it never felt right
People always say, live life with no regret...
I guess they haven't met you yet

You had a way of making me feel good
And in a second, so misunderstood
You were never thinking that you'd stay
But I was fun to fuck along the way
I got burned and you were fireproof
I got burned and you were fireproof

I got burned and you were fireproof
