

Wherever I Go

Meg & Dia

Keep it down
The town was sleeping, we were waking up
The streets were dark and blue and running hot
We drifted on our bikes into the cold
To brighter lights in little Tokyo

Take a breath
Is this the winter up against the bloom
A flannel feathered mess around your room
It's funny how the stories start to bleed
Did I tell them to you, did you tell me?

Still I carry you in everything I do
You are with me when I walk alone
And I wonder to if I am there with you
Cause you're here wherever I go
Wherever I go
Wherever I go

In the dark
You were talking to a shadow when I slept
You were looking like your mom more than you had
Mirror image when you shaved off all your hair
And it still feels like 4 a.m. everywhere

Still I carry you in everything I do
You are with me when I walk alone
And I wonder to if I am there with you
Cause you're here wherever I go
Wherever I go
Wherever I go

Midnight movies I didn't see you coming
Got you high for the first time, you're still going

Still I carry you in everything I do
You are with me when I walk alone
And I wonder to if I am there with you
Cause you're here wherever I go
Wherever I go
Wherever I go
Wherever I go

In the light
You have to leave for Long Beach when you wake
And you fix yourself up just so you can break
