

It Happens All The Time

Megan Hilty

It's there all around and simple enough
Two people meet and they fall in love
They say that you know, it doesn't take long
For feelings to grow

I picture the place and even the time
The words that he'd say if someone was mine
But it's all in my head, cause I'm here alone
So tell me what I've done wrong

Everybody always says that it happens all the time
And I told myself I'd never be here standing last in line
But feels like I'm the only one that the world has left behind
So will the next one be mine if happens all the time?

Somewhere lovers had to meet
I'm tired of searching every face I see
I'm starting to feel the Cupid forgot
That I'm waiting here, the dreamers are shy

The clouds in the sky are blocking my view
Day after day I'm looking for you
Maybe I'm fine and it was just fate
But we didn't meet and you turned away

Oh, everybody always says that it happens all the time
And I told myself I'd never be here standing last in line
But feels like I'm the only one that the world has left behind
So can the next one be mine if it happens all the time?

Some will win, some will lose
Who's to know what to do?

Now that I try,
I see that it takes
All that I have
Till my heart will break
If love's on the way
It has to come now
Cause I've been so down
And soon I'll be out

Everybody always says that it happens all the time
And I told myself I'd never be here standing last in line
But feels like I'm the only one that the world has left behind
Please let the next one be mine if happens all the time
