Megan & Liz

You look so lovely with your eyes on me
I can feel your heart beat on mine
You know I'm leaving, but I hope you see that
We don't have to give this up

We'll always have tonight, so don't say goodbye

No matter where we are, we'll always have the stars
We'll always have this love, whenever you look up
The sky is there for me, even when you can't be
Just know that no matter how far, we'll always have the stars

The end of the night, this love's still alive
I don't have to let it go
Well, maybe, baby, let's stay out all night
'Cause I just don't wanna go home

No matter where we are, we'll always have the stars
We'll always have this love, whenever you look up
The sky is there for me, even when you can't be
Just know that no matter how far, we'll always have the stars

A place to go when the heart's alone
I can feel your love right above me

No matter where we are, we'll always have the stars
We'll always have this love, whenever you look up
The sky is there for me, even when you can't be
Just know that no matter how far, we'll always have the stars

We'll always have the stars
We'll always, always have the stars
We'll always have the stars
