

## My Left Hand

Meghan Patrick

It's always been good at holding a cold beer  
It held the barrel of a gun steady on a ten point deer  
It knows its way around a twelve fret neck  
And it can land a good punch when I'm seeing red  
The best thing about it now is something I used to only dream a bout

Till the right one came along and changed my whole world  
Got down on one knee, asked "Do you wanna be mine forever girl?"  
You can bet I said, "Yes", even though I could barely catch my breath  
Now the best thing about my left hand is the ring on it  
From the right man

He's the kind of man that makes it understood  
You don't have dull your shine just to make him feel good  
Yeah, he said this rock is the shiniest thing  
That he could find next to me

Yeah, the right one came along and changed my whole world  
Got down on one knee, asked "Do you wanna be mine forever girl?"  
You can bet I said, "Yes", even though I could barely catch my breath  
Now the best thing about my left hand is the ring on it  
From the right man

Now me and my left hand shine a little brighter 'cause of a good man

Yeah, the right one came along and changed my whole world  
Got down on one knee, asked "Do you wanna be mine forever girl?"  
You can bet I said, "Yes", even though I could barely catch my breath  
Now the best thing about my left hand is the ring on it  
From the right man  
From the right man
