

Just Because It Feels Good

Mel McDaniel

One more round the drinks're on the table
One more time we slow dance across the floor
Softly in the dark we cling together
And I've never wanted any woman more

Your eyes tell me that it would be so easy
And I tell myself no one would ever know
Here we are so close to love it scares me
And here I am a long long ways from home

Now I know that we can spend the night together
Oh I can see the promise in your eyes
And I know that it would feel so good to love you
But just because it feels good that don't make it right

Well it's closing time the place is almost empty
And we walk to the door side by side
I can almost feel you lying warm beside me
As I kiss your cheek should I say goodbye

Cause I know that we can spend the night together
Oh I can see the promise in your eyes
And I know that it would feel so good to love you
But just because it feels good that don't make it right

Honey just because it feels good that don't make it right
