

## Stars

Mel McDaniel

I've heard stars on the jukebox and on the radio by my bed  
I've seen stars in the heavens that wise men have read  
And I've seen stars on the screen  
But honey you're the brightest star I've ever seen

I've seen stars that protect us and stars in rhinestone suits  
I've seen stars down in Texas on helmet's cowboy boots  
And I've seen stars in my dreams  
But honey you're the brightest star I've ever seen

You guide me through my darkest night and warm me with your glow  
You love me till you leave me seeing stars each time you go

I've seen stars on some guitars we've got 'em on our flag  
I've seen shootin' stars that I made wishes when all the things  
got bad  
Seen 'em shinin' tight on ladies' jeans  
But honey you're the brightest star I've ever seen

A little bit of heaven's here with me  
Cause honey you're the brightest star I've ever seen
