

# The Big Time

Mel McDaniel

I had to show the folks back home I could make the big time  
It just took a little longer than I planned  
Goin' steady with the highway engagements can be broken  
Married to my music now I just don't understand

Here I am in the big time and the spotlights turning blue  
I remember all the big times back with you  
But there's always something missing no matter what I do  
Oh I guess I had my big time back with you

I've got keys to every city they know all about me  
But they'll never know the way I feel inside  
Lord this Oklahoma mem'ry just goes on forever  
You're a part of me and my love will never die

Here I am in the big time and the spotlights turning blue  
I remember all the big times back with you  
But there's always something missing no matter what I do  
Oh I guess I had my big time back with you  
Oh I guess I had my big time back with you
