

This Human Chain

Melissa Etheridge

Break my heart until it opens
Move my stars across my sky
Shine me up, mmm, I have seen the omens
I am two spirits to the naked eye

Time to come together, time to realize
I cannot blame the other, my life is my design
Time to come together, time for me to see
My brothers and my sisters, just another part of me
Hey, uh huh

This human chain will be unbroken
By and by, love, by and by
This human chain goes on forever
It's you and I, it's you and I

Time to come together, time to realize
I cannot blame the other, my life is my design
Time to come together, time for me to see
My brothers and my sisters, just another part of me

Time to come together, time to realize
I cannot blame the other, my life is my design
Time to come together, time for me to see
My brothers and my sisters, just another part of me

Time to come together, oh, time to realize
Time to come together, time to come together
