

Nuke

Mellow Fellow

Hey darling
When will I see you again?
Are you breathing?

Bombs away
Radioactive fresh air

Napalm through your lungs
Love in your heart

Will you remember me?
When I climb your tree
I know you're gone, I just want to see you again

Nuclear fission
Breaks our season

The blinding light
Opens our eyes

3rd degree burns
I'll clean your wounds

Will you remember me?
When I climb your tree
I know you're gone, I just want to see you again

I'll see you again
I'll see you again
I'll see you again
I'll see you again
