

Edgar The Elephant

Melvins

These my friends and family
They come and calling back
Not supposed to be
Impossibility

A half a billion miles
He's not alive to say
He died with the other three
And now he know his name
What we don't know where worldwide
What could it be
Gets a medical tea
To getting it out of me

Vaccination
Vaccination, zeroes you have written by the fragile words and t
ongue

These my friends and family
They come and crawling back
Not supposed to be
Impossibility
