

Eternal Flight

Memoria

Look
Sense the peace
And harmony
Glorious is dance of fireflies
Go
Spread your wings
Of unleashed hopes
Spread them and fly heading for the stars
And let them drive you over universe

Past the suns exploding
Moons in pieces crumbling
Down in their crazy trying
Survive complete chaos
Watch planet cemeteries
Helpless red dwarves and black holes
Each multiplies
All the mad chaos

Spread your wings and fly on further
Cross the space through unknown galaxies
Then get back home
To travel on...
And seek the wonders in the simplest things
Come
To where hope springs
Eternally
Eternally
And feed on lives that thrive no matter
How hard times are and do not worry

Our planet may be dying
Due to the race evil-minded
Though we wish to die when trying
To conquer all the chaos
We might stop destruction
With brand new devotion
There is just one survivor:
That is the total chaos

Recall fireflies
When you are down and all seems
Lost in shadows
Desperation
Growing in you
While you are trying to suppress all your demons
And revelation
Has not helped yet as if no one had heard
Simple orders
To live as equals
Enjoy the day as the only one left
And keep on smiling
Keep on trying

Our planet may be dying
Due to the race evil-minded
Though we wish to die when trying

To conquer all the chaos
We might stop destruction
With brand new devotion
There is only one survivor:
Absolute chaos

And seek the wonders in the simplest things
Come
To where hope springs
Eternally
Eternally
And feed on lives that thrive no matter
How hard times are and do not worry
