

# Just Another Day

Men Without Hats

Memories, hopes, and thoughts of all kind  
Led me back to the door where the long road winds  
Into yesterday  
When you smiled, I laughed, and my soul did shine  
'Cause I knew that I was back and I knew that you were mine  
In just another way

All the times we had, some happy some sad  
It made me so glad to know  
Places we'd been, headspaces we were in  
Where even all the lonely people  
Must surely go

Under that rainbow way down low  
There's a minute to spare, underneath your little toe  
Just to wish upon a star  
And the stairway to heaven that reaches up there  
Takes a lifetime to climb but on your way through the air  
You learn about the way things are

Watch the people live, are they searching for love  
As they move into their dreams?  
Where they'll find out just how fast things can change  
How nothing is ever just quite  
The way it seems

And it's just another day  
Just another day  
Just another day

So you move into your dreams and follow in the crowd's array  
Of a million different schemes and thoughts you're watching drift away  
Can you remember back in time the time I wished that you would stay?  
For just another day

So you "vesti la giubba" and go on with the show  
When you sing about love, do you really want to know  
How it's really going to end?  
People came from miles around to hear your guitar  
That you ring like a bell and they say you'll go far  
Love is just around the bend

But there's still something missing, you can see in the mirror  
That they're sending in the clowns  
Flying high as they watch and whisper in the wings  
The things they'll only really understand  
On the way down

And it's just another day  
Just another day  
Just another day

Memories, hopes, and thoughts of all kind  
Led me back to the door where the long road winds  
Into yesterday  
Memories, hopes, and thoughts of all kind  
Led me back to the door where the long road winds

Into yesterday

Just another day  
Just another day, just another day  
Just another day  
Just another day, just another day  
Just another day  
Just another day, just another day  
Just another day  
Just another day, just another day  
Just another day  
Just another day, just another day  
Just another day  
Just another day, just another day  
Just another day  
Just another day, just another day  
Just another day  
Just another day, just another day  
Just another day
