

They will never know the way
I feel, won't give up
But I told you what I need
Get yourself together, please
Got a taste so bitter
Come back talking sweet, reconsider
They call me naive
But I'll find you when you leave

I never read the signs, driving with no lights
Baby, I've been blind over you
Guess we'll never know when it's time to go
Hell is not the same without you

Together, we're so toxic
But your love is something I can't lose
They don't know you like I do
Together, we're so toxic
But my life is nothing without you
Yeah, I know you feel it too

The way you got me wrapped around your finger
I just wanna make the story stop
Then again, when you hold me
I know that you're everything I want, so
Told ya I don't like it how we pick fights, baby
Know I should leave you, but I'm a ride or die, baby
Locked in it, all in it, I should've known but

I never read the signs, driving with no lights
Baby, I've been blind over you
Guess we'll never know when it's time to go
Heaven's not the same without you

Together, we're so toxic
But your love is something I can't lose
They don't know you like I do
Together, we're so toxic
But my life is nothing without you
Yeah, I know you feel it too

Yeah, I know you, know you ain't been no angel (Yeah)
All the times you got my heart into danger (yeah)
But I'm doin' it too, I'm just like you
We go up and down on this roller coaster
Push away when we getting closer
We say it's over, but it's

Yeah, I know you, know you ain't been no angel (Yeah)
All the times you got my heart into danger (yeah)
But I'm doin' it too, I'm just like you
We go up and down on this roller coaster
Push away when we getting closer
We say it's over, but it's never
