

# Ever Needed

Mereba

Test my luck for brighter days  
It's a vicious cycle  
Every night I close my eyes  
For the reason why  
It's been a bumpy ride  
Should I have made a right?  
Or ran through that light?  
La-la-la-la-la  
Waiting for the light to change  
You'll be clocking in late  
Fuck them people anyway

Forget all of them, but not you  
I will sit outside on your stoop  
If you ever needed me to  
I'd ride

I'll be there for you  
I will be, I will be  
I'll be there for you  
I will be, I will be  
I'll be there for you

And if you ever needed  
If you ever needed love  
If you ever needed  
I'll be there for you

It was winter, like December  
Late night, front seat, I remember  
Long days, dead ends, mhm  
Resisting rat races  
But when your eyes ain't drying  
Remember you're not an island  
One of them ones, I won't shun you baby  
I love you like the way it should be

Forget all of them, but not you  
I will sit outside on your stoop  
If you ever needed me to  
I'd rise  
When they all forgot about me  
Yeah, you pulled out of that sea  
And you made it easy to be  
Alive

I'll be there for you  
I will be, I will be  
I'll be there for you  
I will be, I will be  
I'll be there for you

And if you ever needed  
If you ever needed love  
If you ever needed  
I'll be there for you  
And if you ever needed

If you ever needed love  
If you ever needed  
I'll be there for you

You can call me, me  
You can call me, me
