

## Meteorite

Mereba

This is our life, this our dream  
This is our love, not what they think  
Fade 'em on sight, come for my team  
This is our life, this our dream  
This is our love, fuck what they think  
Meteorite, passing on the scene

Borrow your brother's car  
We need to see the stars  
Speed past the boulevards  
I will, I will follow

I will follow, I will follow you  
Will you follow, will you follow me?  
With my eyes closed, I will follow you  
Through the wild, will you follow me?

Follow you, will you follow me?

Masterpiece, whole color spectrum  
We belong on an easel  
(It's been artwork, made the art work)  
(It's been hard work, seen some stars burn)  
(It's a odd world)  
You can't tell me it's not destined  
And not one man can steal  
(It's been artwork, made the art work)  
(It's an odd world, how them scars hurt)  
(Now they're artwork)

Saw God on the street  
Deep in a stranger's eyes  
I heard my visions speak

I will, I will follow  
I will follow, I will follow you  
Through the wild, will you follow me?  
With my eyes closed, I will follow you  
Every mile, will you follow me?  
I will follow, I will follow you  
Will you follow, will you follow me?
