

# On The Run

Merkules

I been ridin' solo  
Driving down that old road  
Trying to find a way out I need an escape  
Heavy in the fast lane, I been having bad days  
Driving through the red lights finding my way

And I don't know if I'm wrong or right  
No matter what I'm still taking my time  
I been blinded by the hi beam head lights  
But this road is my only still night

They don't love me like they used to  
They don't love me like they have  
I been out here sense the full moon  
Watch my world slip through my hands  
So ill be back real soon  
I still have things to prove  
So many times I had to lose  
Now I'm back I ain't playin' by no rules

I been on the run I've been tryna dodge the fuzz  
I been working hard and I've been down on my luck  
Snakes in my circle that I thought that I could trust  
Stabbed me in the back but its all fake love  
I've been dripping and I've been thinking and I've been drinking and I'm too  
twisted  
I've been feeling like I might lose touch  
Take another shot but its still not enough

I been ridin' solo  
Driving down that old road  
Trying to find a way out I need an escape  
Heavy in the fast lane, I been having bad days  
Driving through the red lights finding my way

And I don't know if I'm wrong or right  
No matter what I'm still taking my time  
I been blinded by the hi beam head lights  
But this road is my only still night

Yeah  
Its kinda crazy how this life can weigh you down I'm the king of the ring th  
at's why I might just take the crown  
I've been moving in silence not the type to make a sound and through the blo  
od sweat and tears I'ma fight through every round  
I'ma prosper when I have too  
There's not much that I can't do  
I'm good in every good there's not a block that I ain't ran through  
Scars on my face with a body full of tattoos and I get is dubs so I promise  
you I can't lose

Yeah  
Been through the mud I got dirt on my boots  
I swam with tha love that's the word on the truth  
From the curb to the stoop from the burbs to the booth  
Make em search for the clues till the burning the fuze  
Yeah, I'm still driving till my goes go empty

I know I coulda sold out but the fans won't let me  
I'm tryna move forward but my past won't let me  
All my goals right in front of me that's my destiny

I been ridin' solo  
Driving down that old road  
Trying to find a way out I need an escape  
Heavy in the fast lane, I been having bad days  
Driving through the red lights finding my way

And I don't know if I'm wrong or right  
No matter what I'm still taking my time  
I been blinded by the hi beam head lights  
But this road is my only still night
