

Nodding off from the subject of hallucination
Drinking whiskey like water, but really whose to blame em
I'm a product of the people that around me
I had to make noise or they never would have found me
It's way different then them story's that'cha use to
This shit is scary go and call the local news crew, Boo-Hoo
All these new trends do disgust me
Your girl like I'm chubby but she probably wanna fuck me

So welcome inside the house of the gentle giant
Memorizing and I'm exercising my mental timing
The rest who shine who get sent to die in a heavy climate
They petrified by the next assignment the best is rising
I love my people yeah I'm talking bout my whole crew
And that's the difference I don't talk about what most do
If were being honest I'd be lost without my folks too
They held me down and brought me up, when I watch what cold do

And now it's finally gonna make sense
I've been dreaming bout this shit since I was age ten
I can feel it in my bones, in my blood from the liquor in my system to the smoke in my lungs
Yeah I keep it humble I don't get gassed up
Over time I just get back up
So while you talking like you've been there you ain't lived that stuff
I'm sick of thinkin' bout it shut up let me hit that blunt Merk

I'm nodding off from the subject of hallucination
Drinking whiskey like water, but really whose to blame em
I'm a product of the people that around me
I had to make noise or they never would have found me
It's way different then them story's that'cha use to
This shit is scary go and call the local news crew, Boo-Hoo
All these new trends do disgust me
Your girl like I'm chubby but she probably wanna fuck me

No matter what they'll never hold me down
Step into that ring and watch me go three rounds
Uh now I ain't saying I'm the greatest I'm just saying I ain't playing
You should play this on your playlist, I'ma go hard until theirs nothing even left to say
Cause any day I could get sent away to Heavens Gates
Life is crazy it's completely unpredictable, Society has lied to me and said that I'm admissible
Its pitiful should have seen it coming though its typical
My shit is dope than sniffing blow, they know it come and get a dose
And it's a fact my verse's flyer then these other dudes
A giant like Osiris getting high off of these butter fumes
What a fool, got em' tripping out like who the fuck are you?! son I'm cool, you just too stupid to go from one to two
So while you worry bout the women and the cars I'll be giving em' my vision when I'm splitting every bar Merk

Nodding off from the subject of hallucination
Drinking whiskey like water, but really whose to blame em
I'm a product of the people that around me
I had to make noise or they never would have found me

It's way different then them story's that'cha use to
This shit is scary go and call the local news crew, Boo-Hoo
All these new trends do disgust me
Your girl like I'm chubby but she probably wanna fuck me
