

# Just Leave Us Alone

Mesh

There's a part of me that has no fear  
There's a part of you that makes that clear  
Never thought that I'd stand next to you  
Waiting for the threats to follow through

Hold me tighter  
Until the load gets lighter  
Until the world is safer  
Tearing friends from paper  
And we'll both move forward  
With our lips less awkward  
And our hands stop shaking  
With the risk we're taking

You know..

We belong together  
You've got no idea  
Just leave us alone  
Just leave us alone  
You could try forever  
You'll get nowhere near  
Just leave us alone  
Just leave us alone

There's a place in time for everyone  
Drawing on some inner need for calm  
There's a strength in me to make this stop  
Whether you believe it's true or not

Hold me tighter  
Until the load gets lighter  
Until the world is safer  
Tearing friends from paper  
And we'll both move forward  
With our lips less awkward  
And our hands stop shaking  
With the risk we're taking

You know...

We belong together  
You've got no idea  
Just leave us alone  
Just leave us alone  
You could try forever  
You'll get nowhere near  
Just leave us alone  
Just leave us alone

We've got something special  
You can't comprehend  
Just leave us alone  
Just leave us alone  
You could try to wreck us  
It will never end  
Just leave us alone

Just leave us alone

We belong together  
You've got no idea  
Just leave us alone  
Just leave us alone  
You could try forever  
You'll get nowhere near  
Just leave us alone  
Just leave us alone

You can't touch us, just leave us alone  
You can't fix us, just leave us alone
