

# A Virtual World

**Metalite**

Trying to find a peace of mind  
Everything turns around and around  
For a moment in time  
The oasis in a world that's left behind

The path is lit, you're on your way  
To the land of forever you're here to stay

A virtual world, a cloud in the sky  
It's calling you, dreaming of eternal life  
For everyone, who got the key inside their minds  
A place you call home, a safe place to stay  
Leaving the real world you'll never go astray  
The lonely nights will pass you by  
Released from the pain deep inside

This glorious world keeps you alive (a moment in time)  
The digital orb of life will help you through the night  
A castaway that has been found  
The chosen door will lead you to the main design

The path is lit, you're on your way  
To the land of forever you're here to stay

A virtual world, a cloud in the sky  
It's calling you, dreaming of eternal life  
For everyone, who got the key inside their minds  
A place you call home, a safe place to stay  
Leaving the real world you'll never go astray  
The lonely nights will pass you by  
Released from the pain deep inside

A virtual world, a cloud in the sky  
It's calling you, dreaming of eternal life  
For everyone, who got the key inside their minds  
A place you call home, a safe place to stay  
Leaving the real world you'll never go astray  
The lonely nights will pass you by  
Released from the pain deep inside

A virtual world...  
Yeah...  
A virtual world...  
World!
