

When the daylight fades away  
And the lands of the world turns to grey  
I find myself afraid  
Will you leave or stay to remain

Far from grace  
Like I'm lost in space

A million times I have cried in the night  
And the thoughts they keep turning who was wrong or right  
Through the lonely nights with just the light from the moon  
I have tried to think things over why you left me so soon  
I have seen the signs, and I sometimes were blind  
For the moments you gave me and the precious times  
After all, the conclusion that you made were alright  
To leave the room and get away, alone in the night

Like a ship on a stormy sea (Stormy sea)  
You carried me (You carried me)  
And without you by my side  
Every breath (every breath) I take (I take) is a fight (is a fight)

There's only haze (in this lightless maze)  
In different ways, we set our minds ablaze

A million times I have cried in the night  
And the thoughts they keep turning who was wrong or right  
Through the lonely nights with just the light from the moon  
I have tried to think things over why you left me so soon  
I have seen the signs, and I sometimes were blind  
For the moments you gave me and the precious times  
After all, the conclusion that you made were alright  
To leave the room and get away, alone in the night

Words can't explain (can't explain), how I feel  
I hope that you will be back one day  
Forever, here to stay

A million times I have cried in the night  
And the thoughts they keep turning who was wrong or right  
Through the lonely nights with just the light from the moon  
I have tried to think things over why you left me so soon  
I have seen the signs, and I sometimes were blind  
For the moments you gave me and the precious times  
After all, the conclusion that you made were alright  
To leave the room and get away, alone in the night  
Alone in the night
