

We are traveling through an endless wasteland  
A massive state in a world unknown  
The surroundings are an installation  
A high-tech industry we can't control

For a time we were feeling happy  
The idea of life was state of art  
With a smile we got ourselves in danger  
To the edge where everyone should fall

Artificial Intelligence  
Brings the future to the world  
Intellectual maleficent  
Things that's dead will come alive

In the wastelands there's an evil power  
It will chase us 'til we're dead and gone (Dead and gone)  
The machines of death just growing stronger  
We will fight until the break of dawn

In the end, we will stand in silence  
See the world collapse and fall apart

Artificial Intelligence (Artificial Intelligence)  
Brings the future to the world (Brings the future to the world)  
Intellectual maleficent  
Things that's dead will come alive

Artificial Intelligence  
Brings the future to the world  
Intellectual maleficent  
Things that's dead will come alive

Artificial Intelligence (Artificial)  
Brings the future to the world  
Intellectual maleficent  
Things that's dead will come alive  
(Things that's dead will come alive)  
Things that's dead will come alive
