

Aurora

Metalite

Step into the brightness of Aurora
Enlight the night

The sky is surrounded by shadows
The winds blowing hard and cold
The mystery of transcendence
The curtains of light were told

Illuminates ways of greatness
Shimmering strains of light
The storms of the sun will give us
The glow in the sky at night

The surroundings shines so bright
Like a beacon in the night

Step into the brightness of Aurora
The northern lights will lead you and guide you through the night
The light in the dark this is Aurora
Illuminates the sky and guides your darkest way right through the night

Light! For years it has been a secret
Glow! A secret that's been untold
Elegance! Now when we know the meaning
The pieces are in control

Fear! We will never fear the magic
The magic of light that night
Elements! For us it is holy fragments
From the biggest star up high

Through the deepest worlds, from a place we never been
Burning particles of light

Step into the brightness of Aurora
The northern lights will lead and guide you through the night
The light in the dark this is Aurora
Illuminates the sky and guides your darkest way right through the night

Ah, yeah
Oh, yeah

Step into the brightness of Aurora
The northern lights will lead and guide you through the night
The light in the dark this is Aurora
Illuminates the sky and guides your darkest way right through the night
Leading the way this is Aurora
Illuminates the sky and guides your darkest way right through the night

The night!
