

As time is running out
We hear the scream of the final call
With our eyes we see demise
We live the day as it was our last
We trying hard to not live it fast
Another dream is smashed again

Feel the rain, it's pouring down
Imagination has been left to drown

We are cloud connected
Connected 'til the end of the world
Cloud connected
We are stuck in this place and we will never be heard
Our lives are collected
One by one facing the sky
We'll be cloud connected
Forever 'til the day, the day that we die
'Til the day that we die!

Holding on to the dream we have
With our hearts we gonna make it last
Before our time is dead and gone

As the rain is pouring down
Imagination has been saved for a while

We are cloud connected
Connected 'til the end of the world
Cloud connected
We are stuck in this place and we will never be heard
Our lives are collected
One by one facing the sky
We'll be cloud connected
Forever 'til the day, the day that we die
'Til the day that we die!

Cloud connected
We'll be cloud connected!
We are cloud connected

Cloud connected
Connected 'til the end of the world
Cloud connected
We are stuck in this place and we will never be heard
Our lives are collected
One by one facing the sky
We'll be cloud connected
Forever 'til the day, the day that we die...
