

I dream about things way beyond this atmosphere
Like if I was an astronaut
I definitely wouldn't still be here

Yeah

Space, everlasting time
Distant stars are all around
Threats, of a different kind
Digital defence designed

Riding through sectors to search for a safe place to hide
Until their access is denied!

We will enter and go, into the cyber dome
We will be safe, we will go, into the cyber dome!
High protection of light, far from all of the flaming fires
We will be safe, we will go, into the cyber dome!

Rise, we are rising high
Levelling up, into the sky
Force of protection fire
Real-time processing of power

Riding in circles through rays and the beams from the archways
The defenders of the maze!

We will enter and go, into the cyber dome
We will be safe, we will go, into the cyber dome!
High protection of light, far from all of the flaming fires
We will be safe, we will go, into the cyber dome!

Do you imagine flying weightless
Like satellites in the black sky

We will enter and go, into the cyber dome

We will enter and go, into the cyber dome
We will be safe, we will go, into the cyber dome!
High protection of light, far from all of the flaming fires
We will be safe, we will go, into the cyber dome!

Into the cyber dome!
